### The Story of Wolf...

WOLF is a psychological horror film set in a hotel in the 1980s.

A group of university students are left reeling when their closest friend is attacked by an unknown person in the middle of the night, leaving her permanently scarred by the experience.

The friends try their best to track down the culprit themselves, but are frustrated when they find that they cant remember what happened due to the amount of alcohol they consumed the night before.

However, there is one person, Alice, pure hearted, god-fearing and kind, starts having very strange dreams in which she sees herself hurting her closest friend and in even stranger dreams, sees herself turning into a wolf.

▶ PLAY

We follow Alice as she comes to terms with the fact that she might have betrayed the people closest to her, and finds her mind deteriorating as the wolf inside her takes over...
